Senior QA Automation Engineer | Quality Engineering Leader | Mobile, Web & AI-Assisted Testing

PROFESSIONAL PROFILE

Senior QA Automation Engineer with 12+ years of experience leading quality strategy, automation architecture, release readiness, and cross-functional QA teams across web, mobile, healthcare, and media platforms. Proven success building scalable automation frameworks, reducing testing cycles, improving release confidence, and mentoring distributed QA teams. Deep expertise in Playwright, Cypress, Selenium, Appium, Espresso, XCUITest, CI/CD, compliance testing, and AI-assisted quality engineering using Claude, OpenAI Codex, GitHub Copilot, Gemini, and Glean.

CAREER HIGHLIGHTS

- 12+ years in Quality Engineering and Test Automation.
- Reduced test cycle time by 70% in FDA-regulated healthcare environment.
- Led QA strategy across Web, iOS, Android, accessibility, and compliance initiatives.
- Built automation frameworks using Playwright, Cypress, Selenium, Appium, Espresso, and XCUITest.
- Led offshore QA teams and cross-functional release readiness efforts.

PROFESSIONAL EXPERIENCE

Senior QA Engineer (QA Lead) | The New York Times | *Nov 2023 – Oct 2026*

- Mentored offshore QA resources and improved overall testing efficiency.
- Designed and scaled automation using Playwright, Espresso and Appium to increase regression coverage and reduce manual effort.
- Led QA for web and Android, using AI coding tools (Claude, GitHub Copilot) every day to speed up writing, refactoring, and debugging Playwright, Espresso, and Appium tests while handling multiple QA and release responsibilities.
- Used Glean and Gemini every day to pull context from internal docs, Jira, and past release history, and to draft test plans and summarize findings. This sped up test planning, root-cause analysis, and release-readiness decisions.
- Partnered with product managers and engineers on risk assessment, test planning, TDD, A/B testing, and release validation.
- Built and maintained a Claude Firebase Sale Setup agent/skill to set up sale configurations across surfaces, update timestamp intervals and sale messages, and detect, diagnose, and fix accidental changes.
- Created custom Claude skills to create, review, and heal Playwright end-to-end tests, speeding up automation coverage for existing manual test cases.
- Led QA regression for recurring NYT Games sale launches, validating banners, CTAs, messaging, and sale configurations across web, iOS, and Android, ensuring launches shipped without P0/P1 defects and did not interfere with gameplay.
- Helped drive consistently strong subscription-sale performance, with recurring NYT Games sale launches substantially exceeding projected subscription targets and contributing to significant revenue impact.

Senior QA Automation Engineer II | Butterfly Network | *Apr 2021 – Jul 2023*

- Reduced test cycle time by 70% while improving release cadence.
- Led FDA-regulated Verification and Validation testing activities.
- Designed Cypress automation framework and expanded quality coverage.
- Built native Espresso and XCUITest automation suites for mobile medical ultrasound applications.

Senior Mobile Automation Engineer II | Aetna (CVS Health) | *Dec 2020 – Apr 2021*

- Developed cross-platform automation frameworks using Espresso and XCUITest.
- Performed accessibility and ADA validation testing across iOS and Android applications.

Senior Software Engineer in Test | WW (Weight Watchers) | *Mar 2017 – Nov 2020*

- Designed native mobile automation frameworks using Espresso and XCUITest.

- Led migration from Appium to native frameworks for improved stability and performance.
- Set up an in-house mobile device lab on Jenkins and built Cypress web automation.

QA Automation Test Lead | NYC Department of Sanitation | *Apr 2016 – Mar 2017*

- Migrated legacy automation from QTP/UFT to Selenium using TypeScript.
- Mentored QA engineers and implemented TypeScript-based automation framework.

QA Automation Lead | NYC Department of Health & Mental Hygiene | *Aug 2015 – Apr 2016*

- Converted QTP automation to Selenium Java WebDriver.
- Led performance testing and QA lifecycle management.

Mobile QA Engineer | Hearst Corporation | *Dec 2013 – Apr 2015*

- Developed mobile and web test automation using Appium and Selenium.

TECHNICAL SKILLS

- **Test Frameworks:**
  - Web: Playwright, Cypress, Selenium, WebDriverIO, Robot Framework, Protractor
  - Mobile: Espresso, XCUITest, Appium, UiAutomator, Jetpack Compose
- **CI/CD, Source Control & Cloud:** Jenkins, CircleCI, Bitrise, GitHub, Bitbucket, Docker, AWS, Firebase
- **AI Tools & Agents:** Claude (custom agents & skills), OpenAI Codex, GitHub Copilot, ChatGPT, Gemini, Glean
- **AI-Assisted QA:** AI-generated test scaffolding, agent and skill development, prompt engineering for test design, AI-assisted debugging and triage
- **Test Management:** Jira, Xray, Zephyr, TestRail, HP ALM
- **Languages:** Java, Kotlin, Swift, JavaScript, TypeScript, Python
- **IDEs:** Visual Studio, Android Studio, Xcode, IntelliJ, PyCharm, WebStorm
- **Compliance:** HIPAA, FDA, GDPR, ADA, Accessibility

CERTIFICATIONS & PROFESSIONAL TRAINING

- ISTQB / ASTQB Certified Tester [2015]
- Quality Engineering Leadership & Agile Testing Practices
- Risk-Based Testing and Release Readiness
- Advanced Mobile Automation
- AI-Assisted Test Design and Automation using Claude and Gemini
- FDA V&V, HIPAA, GDPR, Accessibility Testing

EDUCATION

Brooklyn College, City University of New York *[2010]*
Bachelor of Business Administration (Marketing), Minor in Economics
